

## FRAC 3, 4, 11

- The Kannar™ SeedKOTE™ Corn IF 501 package is designed to control nearly all common early pathogens both seed- and soil-borne: *Fusarium*, *Penicillium*, *Phytophthora*, *Pythium*, *Rhizoctonia* and *Sclerotinia* species.
- The range in species is largely owed to Metalaxyl and the other fungicides in solution being characteristically broad-spectrum
- The Kannar™ SeedKOTE™ Corn IF 501 package contains neonicotinoid insecticides that have a range of insect pathogen targets

## 2021 Trials

- This blend performed very well in the 2021 trials in combination with the Stine Corn Base Treatment offering
- 86% positive hit rate
- 1-10 bushel/acre increase

## The Custom Blend

| Ingredient   | FI Oz/CWT     |
|--------------|---------------|
| Vitavax 34   | 4.000         |
| Bifenthrin   | 3.600         |
| Metalaxyl    | 0.750         |
| Tebuconazole | 0.350         |
| Azoxystrobin | 0.100         |
| KAN™-7       | 2.000         |
| Inert Blend  | 5.200         |
| <b>Total</b> | <b>16.000</b> |
